

Recommended adhesives for Arbiton vinyl panels with HD Mineral Core and click system

1. Introduction

This document provides a list of recommended adhesives for Arbiton vinyl panels with an HD Mineral Core, designed for floating installation using the click system. While adhesives are not required as the primary installation method for click-system flooring, they can offer additional stability in larger rooms, high-traffic areas, or spaces with increased humidity.

Note: These guidelines do not apply to floors with the integrated Aculay acoustic layer.

2. Floating installation (click system)

The click system allows for easy installation without the use of adhesives. However, in certain situations—such as rooms with elevated humidity levels or large open spaces—the use of adhesive can help enhance stability.

3. Recommended adhesives

Adhesive brand	Product name	Usage
UZIN	KE 68T	Commercial and residential spaces
UZIN	KE 68	Commercial and residential spaces
UZIN	MK 90	Commercial and residential spaces
UZIN	MK 250	Commercial and residential spaces
BOSTIK	WOOD H200 ELASTIC	Commercial and residential spaces
BAUTEC	TEC SPU 15	Commercial and residential spaces
RENOVE	MS ELASTIC 400	Commercial and residential spaces
FORBO	EUROCOL 120 EUROFLEX MS	Commercial and residential spaces
FORBO	EUROCOL 158 EUROWOOD MS PLUS	Commercial and residential spaces

4. Application guidelines

- Ensure that the subfloor is clean, dry, and level before installation.
- **For wall installation:** Adhesive can also be used to mount vinyl panels on walls. Make sure the wall surface is properly prepared in accordance with the adhesive manufacturer's instructions.
- Always follow the adhesive manufacturer's recommendations for proper application.

5. Warranty

Using adhesive incorrectly may void the product warranty. Please refer to Arbiton's product documentation for specific warranty details.
